First of all. Thank you for showing your support!
We couldn't be happier with it.

Last Wednesday we launched a [subscription page](#) for the Statusboard. When we would reach 500 subscribers we were going to make it a public service.

We're very excited to tell you that, we've reached far beyond that number already which means... We're going to make the Statusboard a public service for all of you. We never expected that we reached that number in such a short timeframe.

Working here...

Thanks

Thanks again for the support. Let's do this!

Its meant to be external

Statusboard is something people want to see. All the time. So the best way to experience the Statusboard is to have it on an external screen. Like a 42" LCD screen or on the new Tunderbolt LCD monitors.

Cheers,
The Statusboard team
