T³ NEDERLAND

Teachers Teaching with Technology™

Dear T³ instructors,

I hope this e-mail finds you well.

If it would have needed proof, today we are witnessing the importance of science for everybody's live. It's the scientists working interdisciplinary who are giving data to the politicians, allowing them to make educated decisions for our societies. It's not the experts on one field of expertise alone which could come to wise decisions. It's the integration of biology, medicine, mathematics and computer science enabling us to determine the course of action today. For the challenges ahead of our students, it's our job to provide the best STEM education possible.

In this spirit I'd like to invite you to the 2nd T³ Europe webinar:

#	Webinar T3EU- 2020/02
Date/Time	April 16, 18.30 CET
Instructor	Harshal Chhaya, Steve Debauge, Michel Stella (all TI)
Title	Python on TI-Nspire CX II
Description	Learn about Python programming on TI-Nspire CX II. See how it is designed for new programmers and also allows advanced projects. Observe how Python on TI-Nspire CX II interacts with other TI-Nspire apps and with TI-Innovator Hub and TI-Rover.
Technology	TI-Nspire CX II
Subject	Mathematics, Computer Science, STEM
Tags	STEM, MINT, coding, math, Python
