

Oracle Academy

Advancing technology education globally

Debbie Boetzkes

Program Manager Benelux

Leading transformation through education

Oracle's global philanthropic educational program

Advances technology education, skills, innovation, and diversity and inclusion

Program open to educational institutions and educators around the globe and their students

Free teaching and learning resources—including curriculum, cloud, software, and professional development

Helps educators prepare students with knowledge, hands-on practice, and career-relevant skills

Engages **14k+** educational institutions and educators in **130+** countries

Enables **41k+** faculty to prepare their learners for careers using current technologies

What Oracle Academy Offers K-12/Secondary Schools

Recommended Workshops and Curriculum

- Getting Started with Java Using Alice
- Creating Java Programs with Greenfoot
- Programming the Finch Robot in Greenfoot or Java
- Java Puzzle Ball
- Solve It with SQL
- Oracle Academy Java for Computer Science A
- Java Fundamentals
- Java Foundations
- Java Programming
- Database Foundations
- Database Design
- Database Programming with SQL

Free teaching and learning resources

Getting started: Workshops

Make first experiences with technology fun and engaging, while leveraging best academic curriculum practices.

Use Oracle Academy workshops to:

- Introduce computing concepts to learners in a fun and engaging way
- Incorporate technology and computer science into teaching other academic disciplines
- Offer extra-curricular programs, events and experiences

Free teaching and learning resources

Workshops

Java workshops introduce learners to object-oriented programming using game-based learning methodology, drag and drop interfaces to create 3D animations and 2D games, and interactions with the Finch Robot.

Database workshop introduces database to beginners by challenging them to play the role of a superhero and solve a series of crimes using a cloud-based database development environment.

STEM science workshop presents Einstein's special theory of relativity and is centered on a series of interactive JavaScript simulations through which students can manipulate a flying saucer to explore.

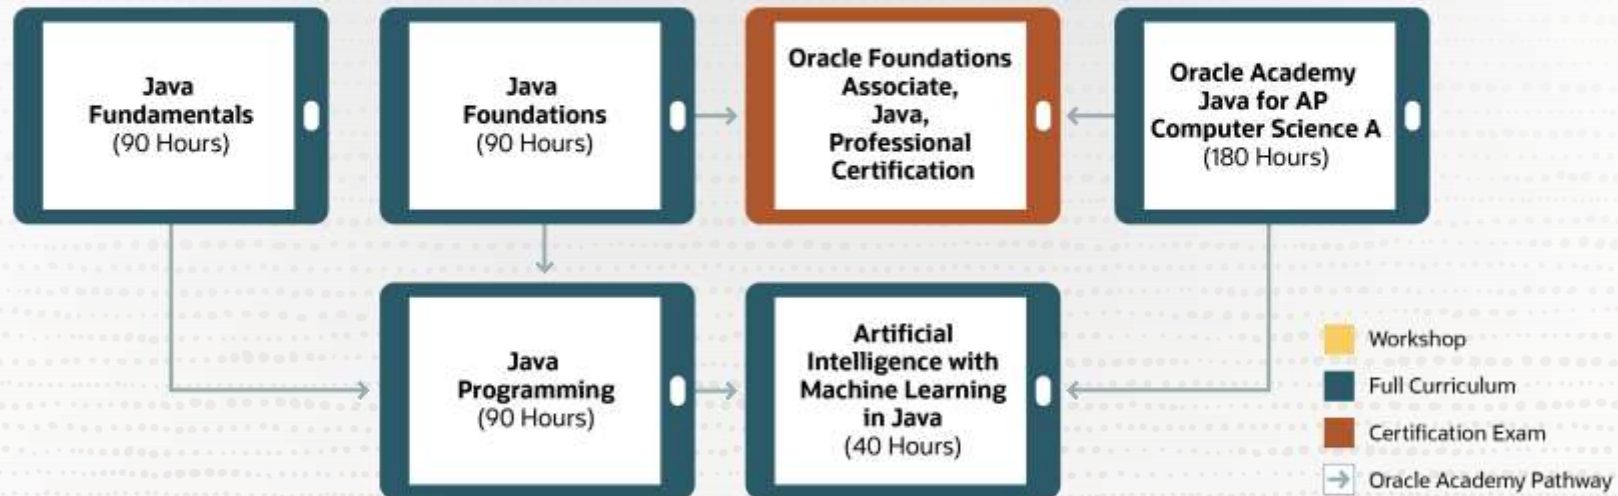

Free teaching and learning resources

Java pathway

Full Curriculum Starting Point

Free teaching and learning resources

Java curriculum

Java Fundamentals

Engages participants with little or no programming experience. Participants are introduced to object-oriented concepts, terminology, and syntax using hands-on, engaging activities on easy to use Java platforms to scaffold the knowledge to create basic Java programs. **90 hours**

Java Foundations

Engages participants with little programming experience in Java programming using a standard Java editor. Participants are introduced to programming concepts, object-oriented concepts, terminology, and syntax, and the steps required to create basic Java programs. **90 hours**

Java Programming

Builds on the skills gained in Java Fundamentals or Java Foundations to help advance Java programming skills. Participants design object-oriented applications with Java and create Java programs using hands-on, engaging activities. **90 hours**

Artificial Intelligence with Machine Learning in Java

Building on the skills gained in Java Foundations and Java Programming, students learn and practice machine learning concepts within artificial intelligence. They are introduced to the terminology, syntax, and steps required to create a machine learning solution in Java using hands-on, engaging activities. **40 hours**

Free teaching and learning resources

NEW Java curriculum for Advanced Placement

Oracle Academy Java for AP Computer Science A

This new curriculum prepares high school/secondary school students for the College Board AP Computer Science A exam as well as the Oracle Java Certified Foundations exam (1Z0-811). This curriculum also may benefit educators and students who wish to extend their Java knowledge beyond Oracle Academy Java Foundations.

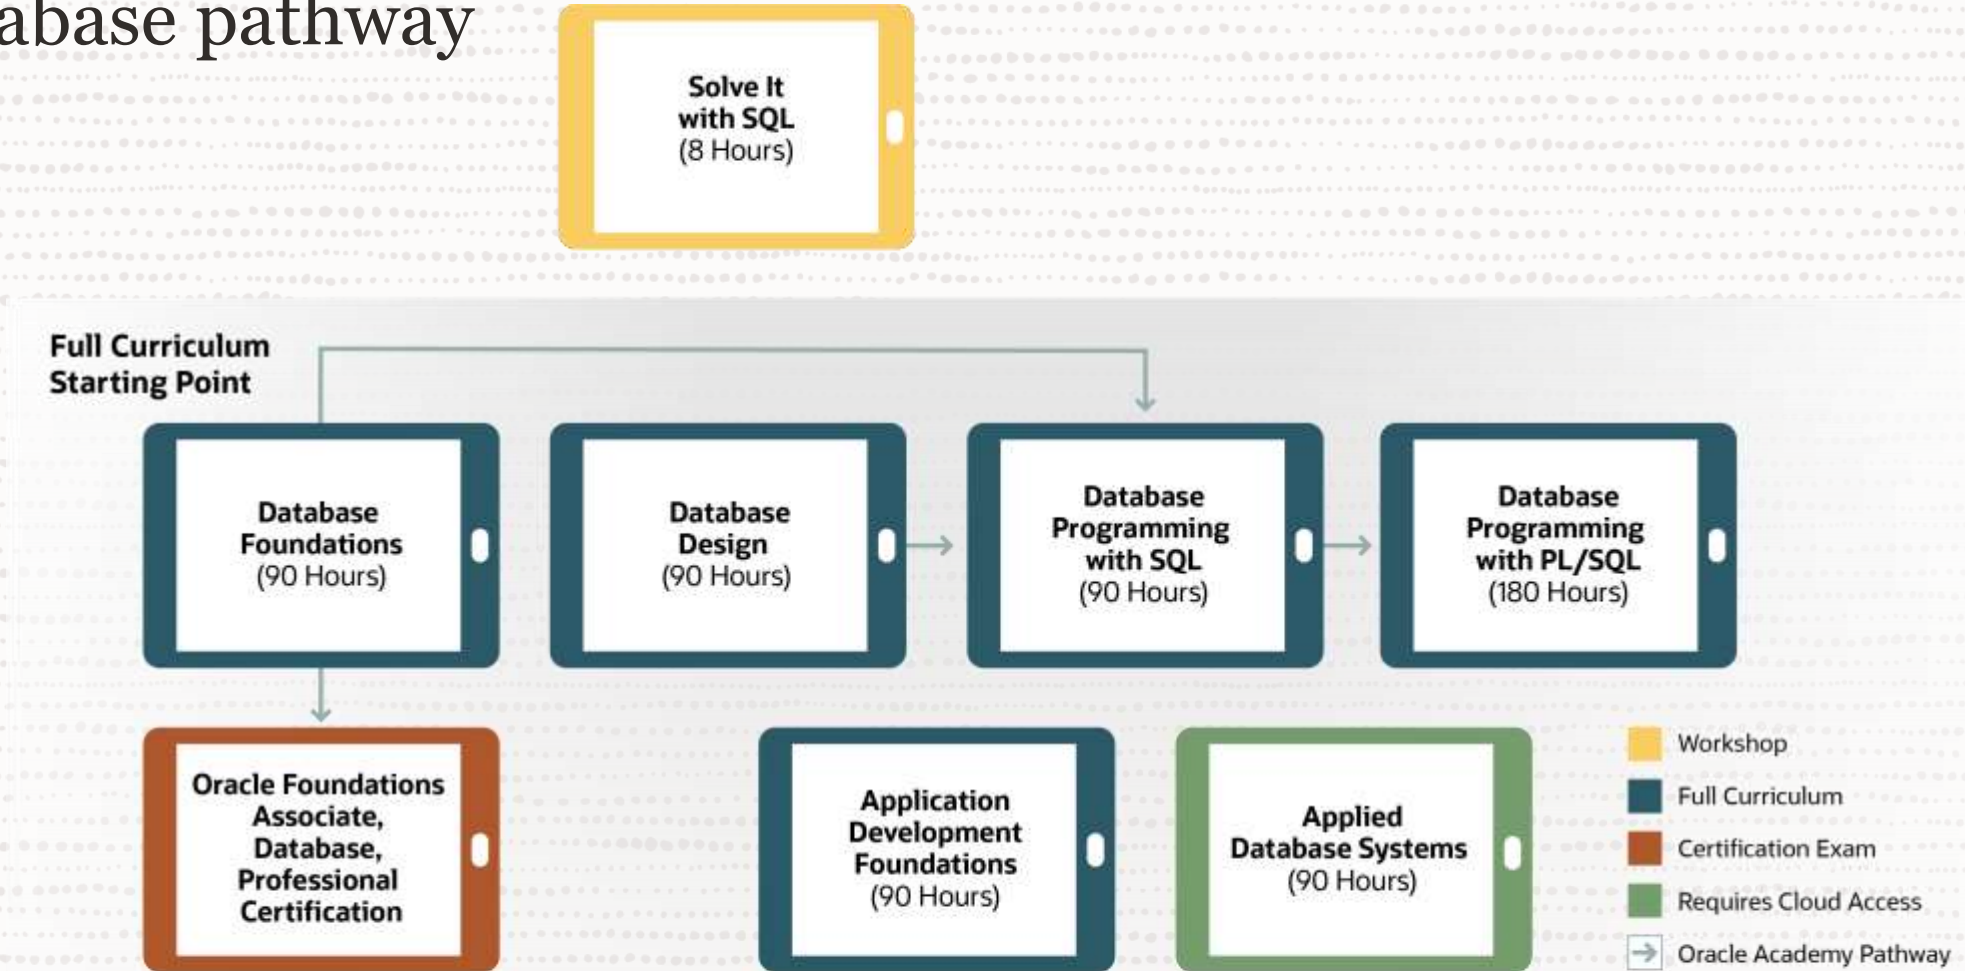

Through hands-on, engaging activities, it introduces learners to object-oriented programming concepts, terminology, syntax, and steps to create basic Java programs, and provides them with the opportunity to design applications with Java.

This course is not required, certified or endorsed by the College Board and completion of this course does not provide any AP credit or credential.

180 hours | 60 CPD credit hours for educators

Free teaching and learning resources

Database pathway

Free teaching and learning resources

Database curriculum

Students are able to learn and get hands-on practice through Oracle APEX and the Oracle Academy Cloud Program, which provides access to Oracle Cloud Free Tier.

Database Foundations

Students with little database experience learn database design techniques, design databases using a modeling tool, and are introduced to SQL to implement and query databases using hands-on practice. **90 hours**

Database Programming with SQL

Students implement database designs by creating physical databases using SQL. The curriculum introduces basic SQL syntax and the rules for constructing valid SQL statements. **90 hours**

Database Design

Students learn to analyze complex business scenarios and create a data model (a conceptual representation of an organization's information), culminating with a project that challenges them to design a database solution for a business or organization. **90 hours**

Database Programming with PL/SQL

Students are introduced to PL/SQL and explore how it extends and automates SQL in administering the Oracle database, and create projects to design, implement, and demonstrate a database solution for a business. **180 hours**

Free teaching and learning resources

Database curriculum

Applied Database Systems

Students learn skills required to build modern cloud database solutions using Oracle Database through hands-on, engaging activities. **90 hours**

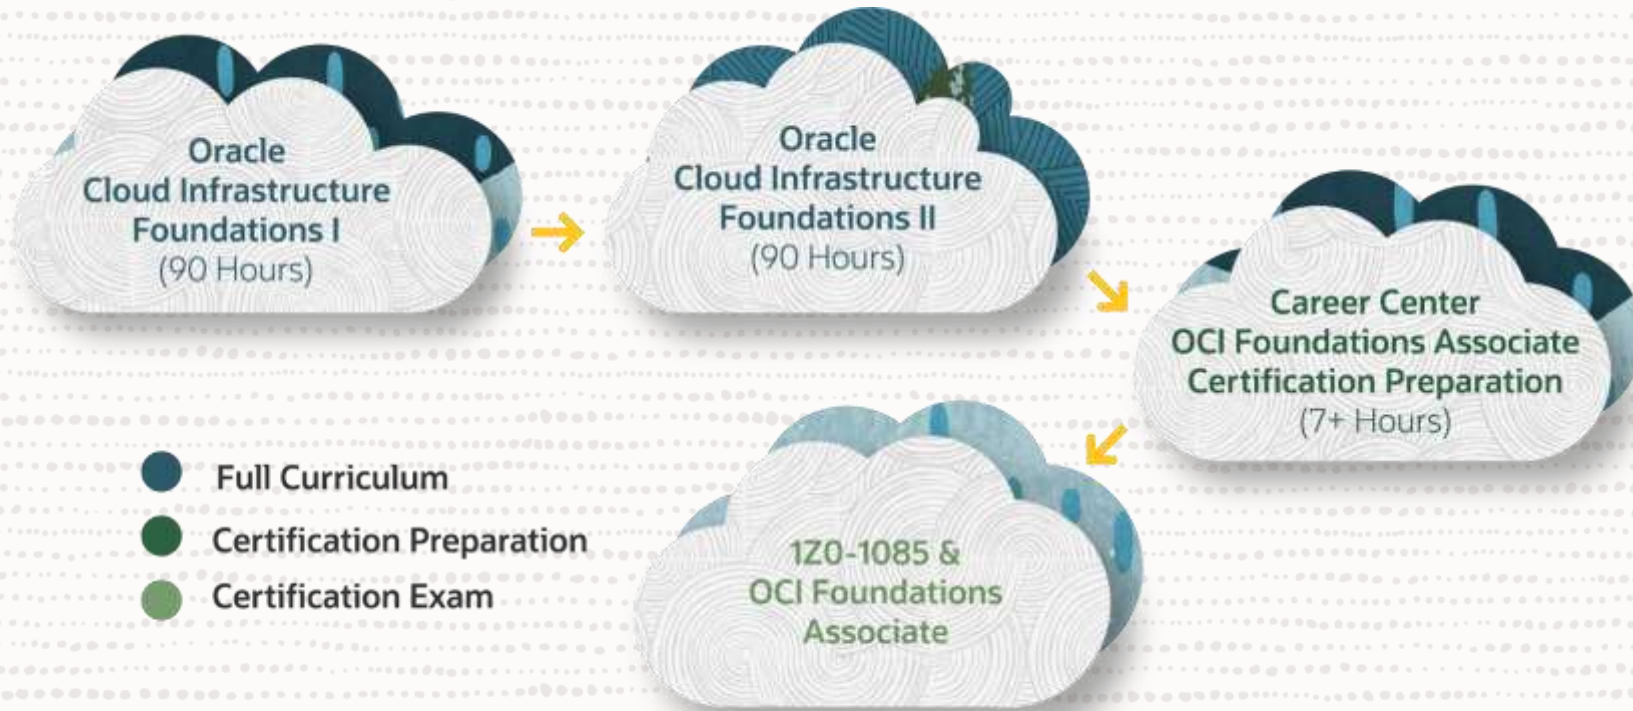

Application Development Foundations

Students learn techniques and tools required to develop database-driven web applications as well as how to design, develop, and deploy database-driven web applications using Oracle APEX. **90 hours**

Free teaching and learning resources

Cloud pathway

Free teaching and learning resources

Cloud curriculum

Cloud Infrastructure Foundations I and II

Oracle Cloud Infrastructure (OCI) leads cloud computing with a deep and broad platform of cloud services that enables customers to build and run a wide range of applications in a scalable, secure, highly available and high-performance environment.

Students can learn about cloud from the cloud leader. This curriculum helps students build foundational knowledge of cloud computing with a focus on OCI concepts and terminology, and then builds on that knowledge with hands-on practice in the cloud.

Free teaching and learning resources

Cloud Infrastructure Foundations I and II introduces students to basic OCI concepts and terminology:

- Core Infrastructure
- Database
- Solutions, Platform and Edge
- Governance and Administration

Throughout the course, learners gain core knowledge of cloud, how it works with databases, and security, administration, monitoring, and management.

To gain deeper hands-on skills, we recommend that educators provide students with access to the cloud through the free **Oracle Academy Cloud Program**. Simply sign up students of the age of legal majority in their country of residence.

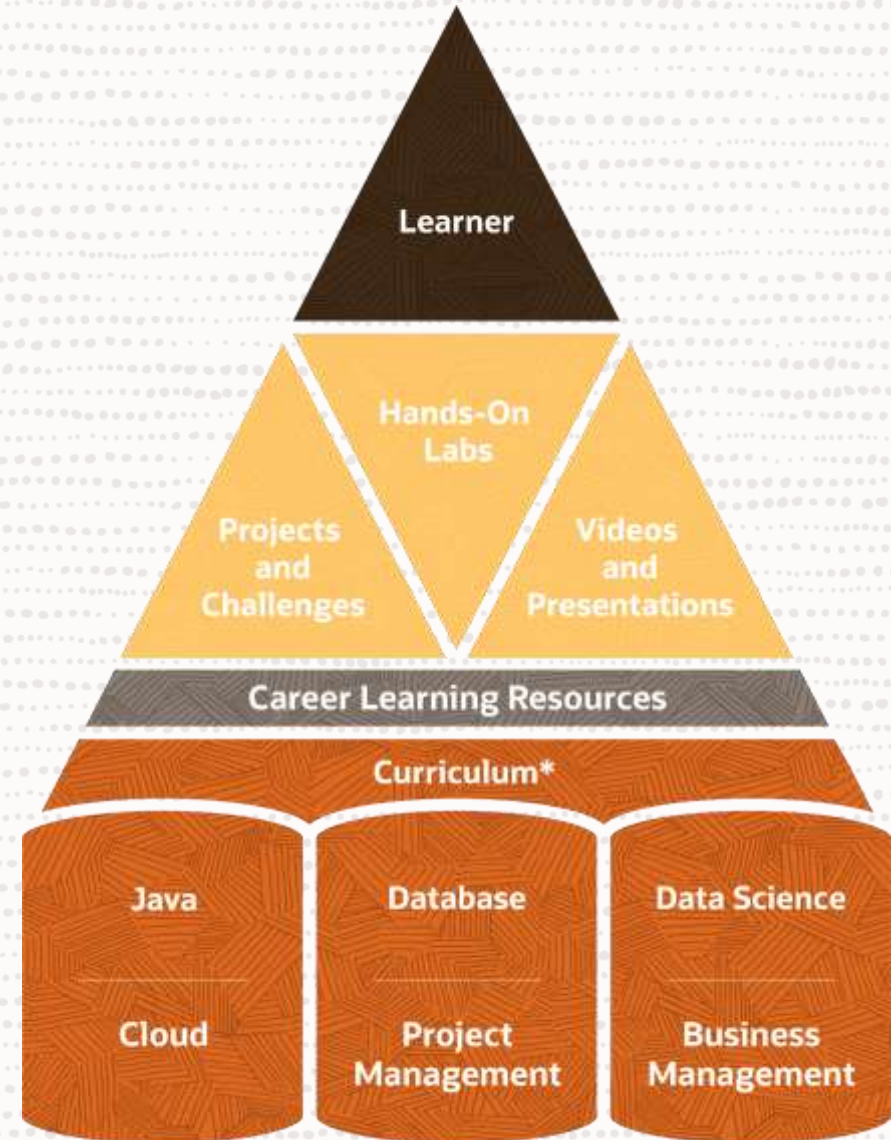

Each 90 hours | 30 CPD credit hours for educators

Gratis teaching and learning resources

Oracle Academy Education Bytes

- Korte, flexibele leermodules in **programmeren, database, data science, big data** en nog veel meer onderwerpen die nieuwe concepten aanleren en bestaande kennis en vaardigheden, probleemoplossing, creativiteit en leerbehoud verbeteren.
- Kan op zichzelf worden gebruikt of als aanvulling op het Oracle Academy curriculum.
- Biedt inhoud in drie formaten: hands-on labs, projecten en uitdagingen, en video's en presentaties.

*Curriculum is available to Oracle Academy Institutional members only.

Oracle Academy Education Bytes

Hands-On Labs—Step-by-step instruction-based labs designed to be facilitated by an educator or self-studied by an individual learner. Some may require prior knowledge or completion of curriculum.

Projects and Challenges—Stand-alone projects that can be used independently of, during, or at the end of an Oracle Academy workshop or course.

Videos and Presentations—These can be used within the classroom or viewed by individual learners at their own pace to learn more about computer science topics.

Oracle Academy Cloud Program

Educators and students teach, learn, explore, build, develop, and practice in the cloud — free of charge.

Free teaching and learning resources

Oracle Academy Cloud Program

Access to Free Tier and Oracle APEX

- Includes powerful Autonomous Database and Oracle Cloud Infrastructure, available to educators and their students for an unlimited time
- Teach and learn in the cloud with one-time classroom setup
- Comprehensive curriculum with startup guides for ADB: SQL, PL/SQL, SQL Builder, plus APEX, Compute VM, Oracle Linux, and Java

Easy signup

- Intuitive signup process and unified console for easy navigation
- Easily provision student accounts, and classes are up and running in the cloud for anytime, anywhere access without the need to download, install, or maintain software, saving hours of time year over year
- IaaS, PaaS & SaaS access via one user interface

Free credits

- 365-day USD\$300 credit
- Learn, explore and build for free in services such as Big Data, NoSQL, Kubernetes, Digital Assistant, Java, Content and Experience and many more

Oracle Academy Cloud Program

- **Always Free: Two Databases per Cloud Tenancy**
 - Each Database gets 1 OCPU and 20 GB storage
- **Free Tools for Application Development**
 - APEX for low-code, web-based app development
 - SQL Developer Web for database development
 - SQL Notebooks for Machine Learning
 - Automatic REST for easy access and publishing of DB data
 - Drivers for all popular programming languages

Oracle Academy Cloud Program

- **Always Free: Two AMD Compute VMs per Cloud Tenancy**
 - Each VM gets 1 GB memory and 50 GB block storage
- **Always Free: Four Ampere A1 cores per Cloud Tenancy**
 - Create any combination of VMs using 4 cores and 24GB total
- **Free for Application Development**
 - Create a Linux VM (Oracle Linux, Ubuntu or CentOS)
 - Develop in multiple languages (Java, Python, Ruby)
 - Develop Web Services (Node.JS, APACHE)
